Format will be distance, in-person, and hybrid. Launch ~summer 2022 and later.
Western Colorado University – Gunnison	Outdoor Industry MBA	Western's Outdoor Industry MBA brings professionals the content and connections of a degree geared specifically to their field. Students take a traditional business core along with specialized tracks that focus on the unique social, environmental and structural elements of the outdoor industry. It is for people who want to move up the professional ladder and bring their lifestyle with them.
Western Colorado University	Master in Environmental Management	Western's MEM program, on a campus surrounded by a living laboratory in the heart of the Rockies, offers interdisciplinary training for building environmental and community resilience.
Colorado State University	Graduate Certificate in Adventure Tourism	The certificate provides students with the theoretical, managerial, and entrepreneurial, knowledge and skills required for successfully developing and managing land, water, and air-based adventure tourism ventures. The certificate courses focus on key areas of knowledge for successful entrepreneurship and advancement within the adventure tourism industry
Colorado State University	Graduate Certificate in Agritourism Management	The Department of Human Dimensions of Natural Resources (HDNR) contributes to informed decision making and a broad based understanding of the ways in which humans value, use, and depend on the natural environment. Whether online or on-campus, HDNR's cutting edge approach to teaching in tourism and conservation equips students with dynamic coursework, experiential learning opportunities, and real world experiences that make a decisive impact on their future. HDNR is a part of the Warner College of Natural Resources.
Colorado State University	Graduate Certificate in Communications for Conservation	The Graduate Certificate in Communications for Conservation is a 6-course, 12-credit program covering concepts and strategies, research and case studies, and tools and skills for successful conservation communications. Focus is given to various methods of community and stakeholder outreach, and public and media relations as they relates to conservation and conservation planning
Colorado State University	Graduate certificate in ski area management	SKAMP is an accelerated online graduate certificate that emphasizes applied and experiential learning specific to the ski industry. This program has been developed to address a need identified by the ski industry for greater graduate educational opportunities to better train the next generation of ski area managers. Much of the content for this graduate certificate is provided directly from ski industry experts from all over North America and the world.  This program is designed to be flexible and to cater to the needs of those already working within the ski industry, as well as those who are looking to start a career within the ski industry. Our students will graduate with the knowledge, expertise, and industry connections that are critical to the successful start or advancement of their careers within ski area management.
Colorado State University	Master of Conservation Leadership	The Conservation Leadership through Learning program at Colorado State University is a master's degree which prepares leaders to address complex conservation issues at local, regional, and global scales. The program is built around principles of experiential learning, interdisciplinary instruction, and applied approaches. Working closely with a network of practitioners and organizations, CLTL is the option for individuals seeking to make a difference in the lives and ecosystems of our planet.
Colorado State University	Master of Tourism Management	CSU's Master of Tourism Management program teaches the skills needed by future leaders of the rapidly expanding global tourism industry. Our holistic approach blends sustainable tourism practices, strategic analysis and industry expertise based on input from our Advisory Board.
Colorado State University	Master of Science in Environmental Leadership	This master's degree prepares leaders to address complex conservation issues at local, regional, and global scales. The program is built around principles of experiential learning, interdisciplinary instruction, and applied approaches.

Colorado Mesa University	Bachelor of Science: Outdoor Recreation Industry Studies	The Outdoor Recreation Industry Studies degree program at CMU prepares students to enter the world of outdoor industry business management, sales, and marketing; as well as adventure and guide services, programming, expedition planning and outdoor leadership. This program recognizes the interdisciplinary nature of the outdoor industry, combining a wide range of coursework in outdoor leadership, business management, innovation and entrepreneurship, adventure planning, tourism, risk management, stewardship and sustainability. Through study and experience, students completing the degree in Outdoor Recreation Industry Studies will be prepared to work in one of the largest growing segments of the economy: the outdoor recreation industry.
Colorado Mountain College	Outdoor Education - Associate Degree	With Colorado Mountain College's Outdoor Education Program, students get the best of both worlds: the groundwork of a liberal arts education coupled with theoretical and hands-on outdoor leadership experiences. They can build a solid foundation for thier future, whether they choose to get a job or pursue a higher degree.

The program includes courses that will improve technical knowledge of back country skiing or snowboarding. It emphasizes the interaction with clients and the natural environment and exposes students to the aspects of running a small business.
Colorado Mountain College	Ski & Snowboard Retail & Repair Shop Technician Certificate	Colorado Mountain College has an international reputation, with the only ski and snowboard business program of its kind. Worldwide business contacts through Colorado Mountain College can give students a great start in the snowsports industry. Students will have valuable opportunities to work and network in the ski and rental shops of Steamboat Springs, Colorado. The program offers real-world experience with repairing and tuning equipment such as how to properly fit boots and secure bindings. Students will be giving skiers the tools they need to have a safe, fun experience on the mountain.
Colorado Mountain College	Ski & Snowboard Shop Manager Certificate	SnowSports Industries America and CMC have created the first industry-wide certification and testing center for the snowsports industry. The program offers real-world experience with repairing and tuning equipment such as how to properly fit boots and secure bindings. Students will be giving skiers the tools they need to have a safe, fun experience on the mountain.
Colorado Mountain College	Ski Area Operations Associate	The best way to learn Ski Area Management is to experience it first-hand. Drive a snow groomer. Help build a new ski trail. Repair a gondola. Colorado Mountain College's epic locale and hands-on philosophy give students the chance to actively work on some of the most notable slopes in the nation. Hands-on opportunities to: Work on major ski competitions such as the World Cup races Be involved in large-scale international events Network with high-level ski and snowboard professionals Intern at any winter resort in the world Learn about the wide range of mountain conditions Use state-of-the-art equipment and cutting-edge technology
Colorado Mountain College	Ski Area Operations: Ropeway Technician-Electrical Certificate	The online Ropeway Maintenance Technician Program from CMC is America's only certification in ski lift and ropeway maintenance. Through a combination of web-based and work experience, employees can become Certified Ropeway Technicians without leaving their workplace. Ropeway Technician students can specialize in two areas: mechanical or electrical. Both specialties include hands-on work experience at the student's workplace supervised by a workplace mentor. When completed for credit, the program provides the student with a Certificate of Occupational Proficiency from the State of Colorado.
Colorado Mountain College	Ski Area Operations: Ropeway Technician-Mechanical Certificate	The online Ropeway Maintenance Technician Program from CMC is America's only certification in ski lift and ropeway maintenance. Through a combination of web-based and work experience, employees can become Certified Ropeway Technicians without leaving their workplace. Ropeway Technician students can specialize in two areas: mechanical or electrical. Both specialties include hands-on work experience at the student's workplace supervised by a workplace mentor. When completed for credit, the program provides the student with a Certificate of Occupational Proficiency from the State of Colorado.
Colorado Mountain College	Ski Area Operations: Slope & Trail Maintenance I Certificate	These certificates provide the student an opportunity to gain the skills necessary to find entry-level employment in the grooming, snow-making, and slope maintenance field. The curriculum includes many of the courses included in the Associate of Applied Science degree in Ski Area Operations and credits may be applied toward that degree.
Colorado Mountain College	Ski Area Operations: Slope & Trail Maintenance II Certificate	These certificates provide the student an opportunity to gain the skills necessary to find entry-level employment in the grooming, snow-making, and slope maintenance field. The curriculum includes many of the courses included in the Associate of Applied Science degree in Ski Area Operations and credits may be applied toward that degree.
Colorado Mountain College	Ski Patrol Operations Level I Certificate	This certificate provides the student an opportunity to gain the skills necessary to find entry-level employment as a career ski patroller. This curriculum includes many of the courses included in the Associate of Applied Science degree in Ski Area Operations and credits may be applied toward that degree. Graduates of the program will receive a Certificate of Occupational Proficiency in Patrol Operations I or II.
Colorado Mountain College	Ski Patrol Operations Level II Certificate	This certificate provides the student an opportunity to gain the skills necessary to find entry-level employment as a career ski patroller. This curriculum includes many of the courses included in the Associate of Applied Science degree in Ski Area Operations and credits may be applied toward that degree. Graduates of the program will receive a Certificate of Occupational Proficiency in Patrol Operations I or II.

Colorado Mountain College	SnowSports Industries America (SIA) Certificate	This certificate provides the student an opportunity to be trained in the different aspects of the SnowSport industry and to gain the knowledge necessary to successfully complete the SnowSport Industries America certification examinations. The Ski and Snowboard Business program has worked with SIA to identify common positions within the SnowSport Industry and test individuals on their knowledge of the curriculum via certification examinations. The program includes courses that will improve knowledge of marketing, retailing, and wholesaling. It emphasizes the business aspects of the industry and contains content exclusively created by the industry for Colorado Mountain College. Credits earned during the completion of the certificate can be applied to the Associate of Applied Science degree in Ski and Snowboard Business. Graduates of the program will receive a Certificate of Occupational Proficiency in SIA Ski and Snowboard Certification.
Fort Lewis College	BA Adventure Education	Adventure Education (AE) is a rigorous program in which students learn to become teachers, leaders, and professional outdoor educators. Classes include indoors and outdoor programs: learn backcountry skills, intern in the industry, immerse yourself in an all-AE semester, conduct and present research, and collaborate with local organizations to solve real problems.

A recreational therapist works with the client, their family members and others significant to the improvement of their health condition. Recreational therapists assist clients to develop skills, knowledge and behaviors for daily living and community involvement. The goal of recreational therapy is to restore, remediate or rehabilitate in order to improve functioning and independence as well as reduce or eliminate the effects of illness or disability.
Metropolitan State University of Denver	Bachelor of Arts in Recreation Management.	The Recreation Professions program, within the Department of Health Professions, provides scholarly instruction and practical experiences to prepare students as skilled recreation professionals and leaders. The program, with contributions of dedicated professionals, will continue to provide educational and practical instruction to establish a solid foundation in recreation and leisure studies. Upon graduation, our Recreation Management students are eligible to sit for their exam to become Certified Park and Recreation Professionals.
University of Denver	Certificate, Energy & Sustainability	In this certificate program, you'll learn how to advocate for the use of renewable energy and sustainability while gaining insight into the way energy sources are used, regulated, and financed.
University of Denver	Energy & Sustainability, Masters Concentration	A shifting energy landscape brings sustainability concerns to the forefront and through this program, you can become an informed advocate for the use of sustainable practices. Learn how energy sources are developed, leveraged, regulated, and financed while assessing trends in energy and cultivating sound environmental policies.
University of Denver, Sturm College of Law	Environmental & Natural Resources Law & Policy LLM	Denver Law provides a world-leading course of graduate study and experience for students seeking greater understanding of these issues, and the associated challenges and opportunities. Along with our environmental and natural resources core classes, we offer our students innovative coursework in renewable energy and sustainable development to better prepare them to excel in their careers.
Front Range Community College	A.A.S in Natural Resources	In the Natural Resources degree program you will explore GIS systems, forest science principles, range land management, and wildlife and fisheries management. You'll participate in community natural resources projects to gain practical skills in forestry, wildlife, aquaculture, fisheries, wildland fire, and the computer analysis of natural resources.
Front Range Community College	A.A.S in Forestry Technology	In the Forestry Technology program you will explore GIS applications, tree care, soils, forestry research and harvesting, water movement, and wildlife and fisheries management, with special emphasis on the principles of forest science, forestry field research and field skills in hydrology and soil science.
Front Range Community College	A.A.S in Wildlife Technology	The Wildlife Technology degree prepares you for a career as a wildlife technician. It focuses on principles and research techniques to assist in wildlife and land management. You'll learn practical field skills, theory, and applications for the study and management of wildlife, fisheries, and wild bird populations.  This degree is accredited by the North American Wildlife Technology Association (NAWTA).
Front Range Community College	Environmental Education Certificate	This certificate program introduces you to the history, legislation, principles, and goals of environmental literacy and education.
Front Range Community College	Forestry Certificate Certificate	This certificate program introduces you to the principles of forest science, dendrology, forest fire behavior, silviculture principles, and research techniques.
Front Range Community College	Natural Resources Certificate	This certificate program builds on the Forestry certificate and covers theory, philosophy, and applications for study and management of wildlife and fisheries resources. Field and laboratory methods are introduced.
Front Range Community College	Natural Resources GIS Certificate	This certificate program introduces you to basic and advanced analytical tools as you develop skills in spatial problem solving.

Front Range Community College	Natural Resources Recreation Certificate	This certificate program combines lecture and practical outdoor experiences relating to problems and trends in outdoor recreation.
Front Range Community College	Wildland Fire Certificate	This certificate program provides instruction on environmental factors that affect the start and spread of wildfire and recognition of potentially hazardous situations. Entry-level wildland firefighters skills are taught. Successful completion of this certificate can lead to a "Red Card," (the Interagency Incident Qualification Card to work as a wildland firefighter).
Front Range Community College	Wildlife Certificate	This certificate program covers theory, philosophy, and applications for the study and management of wildlife and fisheries resources.
Red Rocks Community College	Associate of Applied Science in Outdoor Education	The Outdoor Education program at Red Rocks Community College offers an experiential, hands-on education for students wishing to pursue an associate of arts degree with an emphasis in outdoor education. The completion of this degree is appropriate for those wanting to pursue careers in the recreation, outdoor education, guiding and outdoor leadership fields, as well as those who would like to continue their education at a four year institution.
Red Rocks Community College	Fundamentals of Outdoor Leadership Certificate (Warren Tech)	Through a cooperative agreement with Warren Tech (the career and technical high school for Jefferson County Public Schools), RRCC students pursuing certain career and technical college degrees/certificates may take courses (on a space-available basis) at Warren Tech (WT), which is adjacent to the RRCC campus.
Red Rocks Community College	Outdoor Professional (Guiding) Certificate	The Outdoor Professional Certificate is for those who are seeking a career as a field guide or outdoor instructor in a variety of environments in the outdoor industry. This certificate focuses on understanding industry standards, examining interactions with clients, and experiential learning through field experiences.
Red Rocks Community College	Outdoor Industry Business/Management Certificate	The Outdoor Industry Business/Management Certificate is for those who are seeking a career in the outdoor industry that focuses on business practices. This includes management, ownership, marketing, administrative duties, and more. The certificate will better prepare an individual with the skills necessary to properly operate and manage a business related to the outdoor industry.
Red Rocks Community College	Wilderness Therapy Specialist Certificate	The Wilderness Therapy Specialist Certificate is for students who are seeking a career that uses wilderness as a therapeutic process to help those in need. This certificate focuses on theory within psychology and sociology as well as experiential learning in the outdoors through field courses.
Red Rocks Community College	Facilitation/Education Specialist Certificate	The Facilitation/ Education Specialist Certificate is designed for students who are seeking a career in experiential education and facilitation. The certificate focuses on theory and principles related to effectively educating and teaching others while also emphasizing experiential learning through outdoor based field courses.
Colorado Northwestern Community College	NPS Park Ranger Academy certificate	Instruction at the Colorado Northwestern National Park Service approved Park Ranger Law Enforcement Academy (P.R.L.E.A.) meets or exceeds Federal Law Enforcement Training Center (F.L.E.T.C.) requirements. Upon graduation students will receive an accredited NPS/FLETC PRLEA certificate. This is good for 3 years and will grant them the opportunity to work as a seasonal LE officer with the NPS. Included in the training is Taser, National Highway Traffic Safety Administration DUI/SFST/HGN, and Radar that will upgrade your credentials for obtaining seasonal employment. These courses are part of PRLEA regular training. CNCC employs a full time Lead Instructor and Program Director who instruct, administer, and oversee all aspects of the training. They have over 60 years of combined law enforcement and law enforcement instructor experience and will help you develop the knowledge, skills, and abilities you need to become a successful Ranger in the field.
Colorado Northwestern Community College	Associate of Applied Science (A.A.S) in Park Ranger Studies	CNCC also now offers an option to receive an Associate of Applied Science (A.A.S) in Park Ranger Studies, which combines the NPS Park Ranger Academy certificate with recommended general education courses and electives. If you attend CNCC to get your A.A.S. in Park Ranger Studies, you will be taking courses that have been handpicked to prepare you for success in the academy.
Pikes Peak Community College	Associates of Applied Science in Outdoor Leadership and Recreation Technology	This two-year AAS degree includes a variety of hands-on learning opportunities and a diverse elective list allowing students to enhance outdoor skills in their specific area of interest. Training emphases include outdoor leadership, field studies, group dynamics, risk management, wilderness skills, and low-impact techniques for environmental stewardship. To enhance the learning process, students will utilize their education by applying skills developed within the program to an internship of their choosing
University of Northern Colorado	P.S.M Environmental Geosciences	The Environmental Geosciences P.S.M. program offers advanced scientific training for high-level careers in resource management, energy development, environmental regulation, public policy and related fields. You'll conduct sophisticated fieldwork, data gathering and statistical analysis, while cultivating the managerial and communication skills necessary to lead and communicate about complex scientific inquiries.
Naropa University	Ecopsychology - Master of Arts	Ecopsychology is an emerging field that is developing in recognition that human health, identity, and sanity are intimately linked to the health of the earth and must include sustainable and mutually enhancing relationships between humans and the nonhuman world.

Colorado School of Mines	Environmental Engineering Science	Environmental Engineering science is the study of fundamental biological, chemical, and physical processes that relate to the field of environmental and water resources engineering. Students in this emphasis area usually have interests in environmental microbiology, aqueous chemistry, environmental organic chemistry, biogeochemistry, or fundamental processes associated with engineered water systems.
Adams State University	Bachelor of Arts in Outdoor Education and Stewardship	The Outdoor Education and Stewardship (OES) degree is designed to give outdoor professionals flexibility in building their careers - students gain skills in outdoor leadership, management, education, and environmental stewardship. Located within the department of Biology and Earth Sciences, the OES degree deepens students' knowledge of environmental science and humankind's relationship to the land. With its unique emphasis on stewardship, students will be putting their knowledge to practice by engaging in local projects including trail building, habitat and river restoration, and outdoor education for youth across the San Luis Valley. This degree will give students the skills and experience complementing thier desire to care for and protect wild places.
Trinidad State Junior	Trail Management & Construction	<b>Introduction to Natural Surface Trails and Recreation Management</b>
